Re: OnePoint Services, L.L.C. (Docket No. T-03855A-00-0169/Local Exchange)
OnePoint Services, L.L.C. (Docket No. T-03855A-00-0170/Long Distance)

Dear Anthony:

In your two letters each dated September 14, 2000, you requested that OnePoint Services, L.L.C. ("OPS" or the "Company"), provide additional information regarding the Company's above-referenced applications for a certificate of convenience and necessity ("CC&N") to provide competitive resold local exchange service and resold long distance service in Arizona. Set forth below are the responses of OPS to items A through E of your letters. As you know, OPS currently provides resold long distance service in Arizona via the sale of pre-paid long distance calling cards. However, OPS has not commenced providing competitive resold local exchange services in Arizona pending issuance of a CC&N by the Arizona Corporation Commission. Since all of OPS' assets are currently being used to provide resold long-distance service, the Company has not attempted to separately identify plant and equipment used to provide resold long distance service and plant and equipment that will be used to provide resold local exchange service. If requested by the Commission, this classification of plant and equipment will be provided at the time OPS is prepared to begin providing resold local exchange service.

A. Please provide the value of all plant and equipment currently held by the Company, intended to be used to provide regulated telecommunications service to Arizona customers.

The approximate value of all plant and equipment currently used by OPS to provide regulated telecommunications service in Arizona is \$1,015,019. OPS intends to purchase additional equipment in the approximate amount of \$250,000 prior to the end of 2000, bringing the Company's anticipated year-end investment to approximately \$1,265,019.

Anthony Gatto
October 13, 2000
Page 2

B. Please provide a description of each asset described in response to item A above, including the asset's cost and location.

A general description of the plant and equipment currently used by OPS to provide regulated telecommunications service in Arizona, including the cost of that plant and equipment, is attached to this letter as Attachment "A." Substantially all of the plant and equipment identified in Attachment "A" is located at the Company's Arizona office at the following address:

300 West Osborn
Suite 101
Phoenix, Arizona 85013

C. Please provide the projected value of all plant and equipment to be used to provide regulated telecommunications service to Arizona customers at the time the Company begins serving its first customer.

As set forth above, OPS currently provides resold long distance service to customers in Arizona via pre-paid long distance calling cards. The current value of the plant and equipment used by OPS to provide resold long distance service is \$1,015,019, with additional planned purchases totaling approximately \$250,000 by the end of 2000. OPS will likely purchase additional plant and equipment in order to provide resold local exchange service in the future, but the Company does not have an estimate of the cost of the plant and equipment at this time.

D. Please provide a description of each asset described in response to item C above, including the assets cost and location.

See the response to item B above, including Attachment "A" to this letter.

E. Please explain how the value of the Company's plant and equipment is related to its proposed rates.

The rates and charges set forth in the Company's proposed tariff filed with the above-referenced applications were determined based upon the amount or revenue that would be required to cover all of the Company's operational and overhead expenses (including depreciation and operating leases on plant and equipment and debt service) and to generate a reasonable profit for the Company, which would not, under the circumstances, produce an unreasonable or excessive return on the above-identified plant and equipment investment.

I trust that the information provided herein is responsive to your questions. Please do not hesitate to contact me at the direct line listed above if I can provide any additional information. Pursuant to your instructions, I am filing an original and ten copies of this letter in each of the dockets referenced above.

Very truly yours,

SNELL & WILMER

A handwritten signature in dark ink, appearing to read "Jeff Crockett", with a long horizontal flourish extending to the right.
